PARAPETTO IN VETRO INTEGRATO NEL TELAIO IN ALLUMINIO

GLASS JULIET BALCONY INTEGRATED IN THE ALUMINIUM FRAME

Agg. 20.05.2019

uniform

Parapetto Integrato

Il sistema per parapetto integrato consente di inserire nel profilo del telaio in alluminio della portafinestra una lastra di vetro temperato. Questa soluzione offre il vantaggio di aumentare la luminosità all'interno dell'appartamento utilizzando una portafinestra invece di una finestra, aumentando quindi sensibilmente la superficie vetrata. L'aspetto estetico dell'edificio è moderno e rigoroso grazie alla perfetta simmetria dei serramenti. Il parapetto ha raggiunto la classe massima di resistenza all'urto da corpo molle (Classe 5).

Integrated Juliet Balcony

The integrated Glass Juliet Balcony system allows a tempered glass slab to be inserted into the aluminium frame profile of the French window. This solution offers the advantage of increasing brightness inside the apartment by using a French window instead of a window, thus significantly increasing the glass surface. The building has a modern, austere look thanks to the perfectly symmetrical windows. The Juliet Balcony has reached the maximum degree of soft body impact resistance (Class 5).
