

uni_verso

minimalist window system
wood and wood-aluminium

The genesis of uni_verso

uni_verso is a window system designed to solve concrete problems such as the shortage of qualified personnel, the need to adapt to the minimalist trends increasingly in demand from the market, the need for complex certifications and strong competitiveness.

Strong points of the **uni_verso** system:

- **Ultra-slim concealed sash – just 55mm of visible profile**

Minimal and contemporary design.

- **Removable external cover profile**

The external cover profile can be removed even after the frame is installed in the wall, for quick maintenance, aesthetic customisations, or replacements without invasive work.

- **Two build options:**

wood-aluminium – interior made of Red Grandis wood, aluminium exterior.

wood-wood – interior made of Red Grandis wood, exterior made of Accoya® wood with guaranteed durability over 50 years.

- **Supplied in a box**

The window is supplied in kit box form, with all elements machined at 90°, complete with hardware (glass not included) for simplified logistics and exceptionally fast assembly: just 4 screws for the frame and 8 for the sash.

- **Patented system: sash and frame**

- **Certified sustainability**

Wood from FSC® and PEFC certified forests, for a product with a low environmental impact that truly respects natural resources.

Certifications FSC-C125998 and PEFC/18-31-1409.

- **Dedicated web configurator**

Online configurator that can be customised with the customer's brand, so that estimates and orders can be managed simply, professionally and fast.

At some point the house stops being just a space and becomes light, silence, harmony.

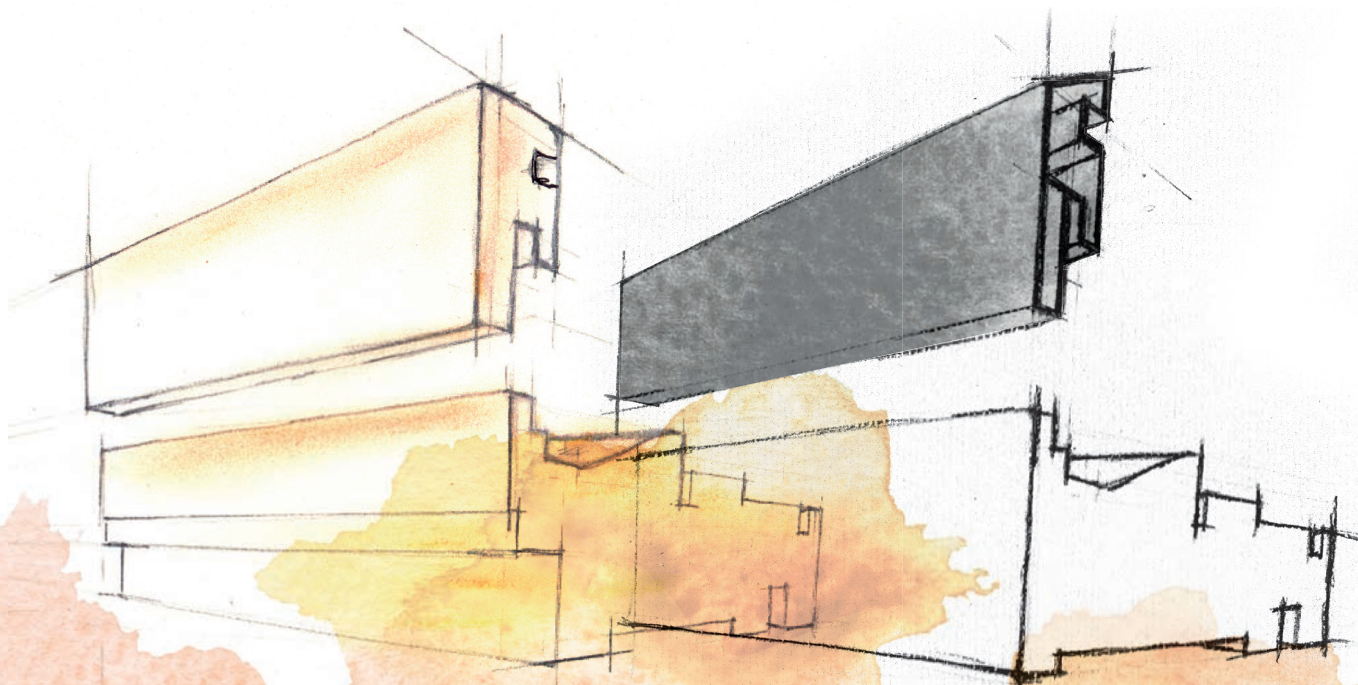

uni_verso *was born for that moment, to let the daylight in, to open the view and let beauty breathe.*

Chairman Uniform SpA

uni_verso

EXPAND YOUR RANGE
DIVERSIFY YOUR OPPORTUNITIES

Maximum business potential
minimal disruption.

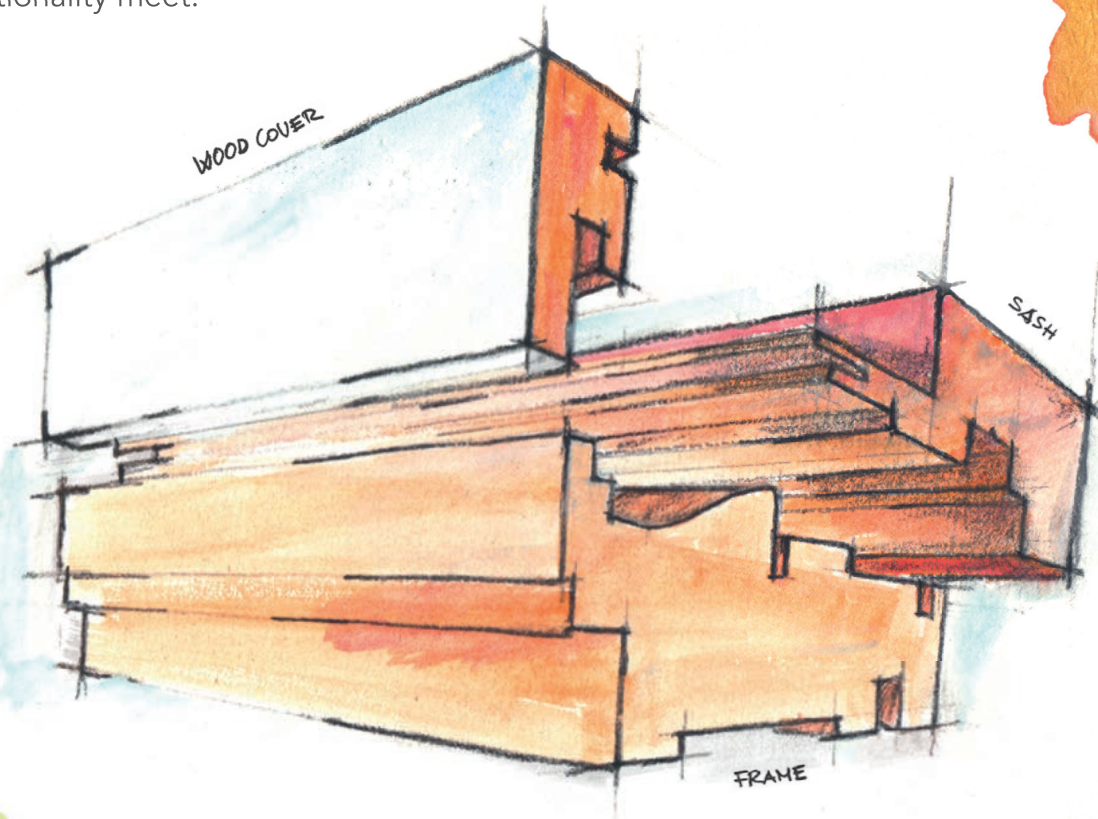

WOOD-WOOD

Wooden windows with
wooden or aluminium external cover.

WOOD-ALUMINIUM

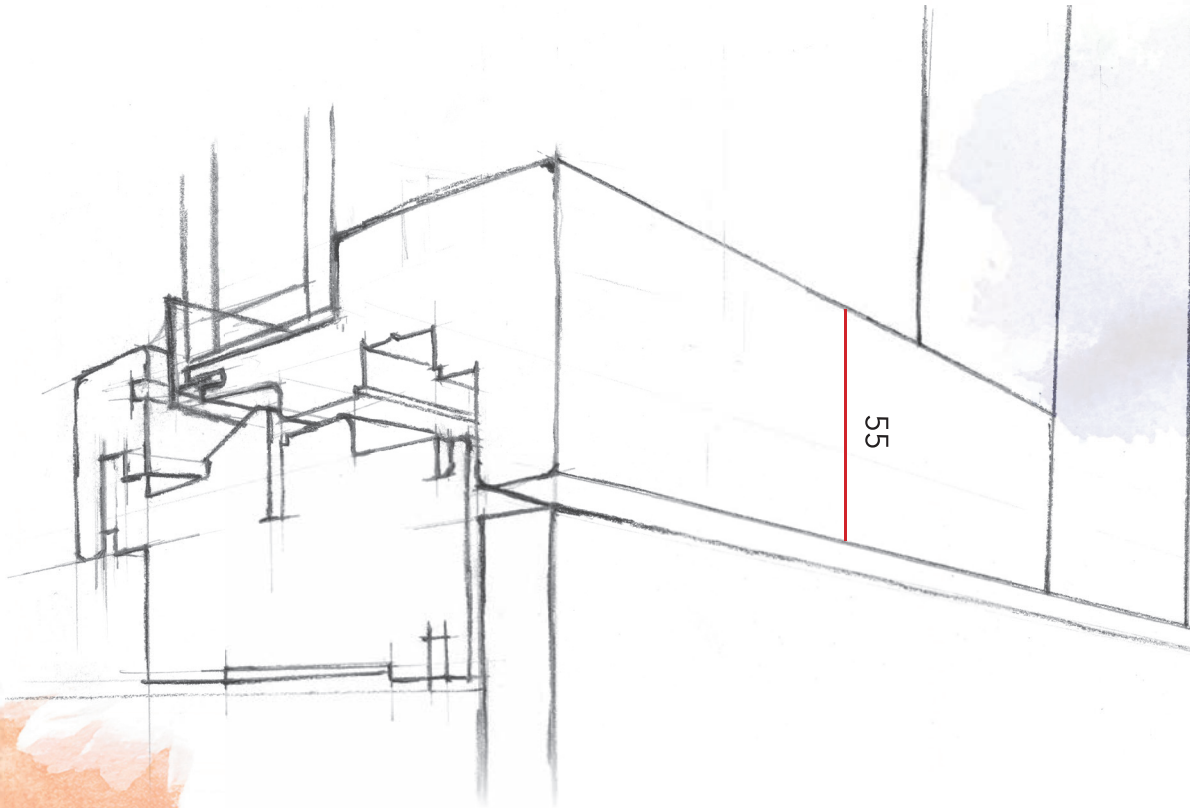

BEAUTIFUL TO LOOK AT, SMART TO MAKE

Where aesthetics and
functionality meet.

SIMPLE AND FAST

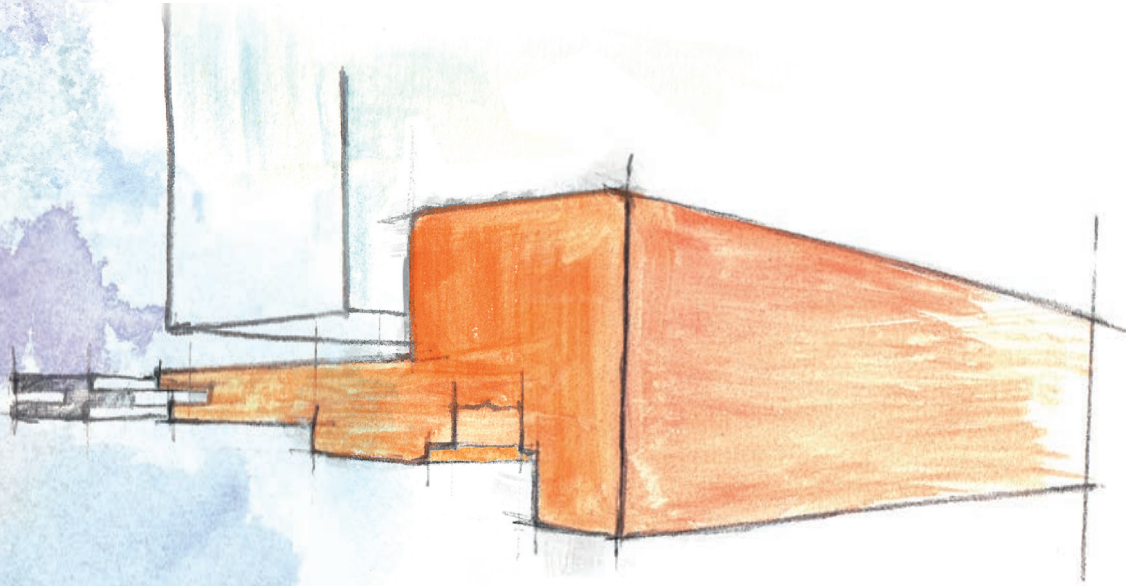

Understanding complexity
to turn it into a process
that is quick and easy.

*Simplicity
is a complexity solved*
C. BRANCUSI

SUPPLIED IN A BOX

The window is not
"built":
it is assembled.

uni

discover
uni_verso

universe /ju-niv3-s/ n. the totality of all that exists; a continuum of space-time that includes matter, energy, planets, stars, galaxies, and the physical laws that govern them. In the astronomical sense, it refers to the set of celestial bodies and the space containing them. The term is derived from the Latin 'universus', meaning 'the whole', 'turning in one direction'.
